Total Participants	10227	1038	9002	896	4586	450	

BBS* = already selected for assay for blood biomarker nested case-control studies

Incident cancers identified only through linkage with the NDI were classified according to standard ICD-10 definitions for the underlying or contributing (record axis) causes of death

Incident cancers identified through linkage with the cancer registries were classified according to primary site and histology categories defined by SEER (http://seer.cancer.gov/siterecode/icdo3_d01272003/)

Total deceased through SSA or NDI:	20,651
Deceased with cause of death:	20,091
Latest linkage with SSA:	4/24/2020
Latest linkage with NDI:	5/12/2020

Cancer Registry Linkages	Last Linkage Completed	Last Linkage Complete Through**	Next Planned Linkage
Alabama	July 2020	December 2017	August 2021
Arkansas	February 2020	December 2017	March 2021
